7kw On-Board Diesel Generator

(Uses Diesel Fuel From Truck Tanks)

This truck runs and drives great!

Has not given us any issues at all.

It holds 150 Gallon of Diesel Fuel and will go 15 hours before you need to fill it back up!!!

We did a lot of upgrades to it, as this was going to be the truck we were going to keep for quite some time, however, since we decided to do some touring series races, my Son found a Toterhome that was slightly newer, with a bigger living quarters and a slide out – which was great for some of the overnite stays we'd be doing. So we're parting with this one.

If you're currently towing with a Dually – towing with one of these is a HUGE upgrade!

It will make someone a great hauler!
